Press Release

Monday December 5th 2011

Proton Products International and FASI Inc announce details of there USA Sales & Service Partnership.

Proton Products International, Beaconsfield, England is a leading provider of measurement and control solutions for the wire, cable, fibre, metals, paper, film, foil and converting industries. Key technologies include Non Contact Laser Doppler Speed & Length Gauges, Laser Scanning Diameter Measurement, Wire Preheating, Flaw Detection and Spark Testing.

FASI-Inc, Dayton, USA established in January 2000 is an employee-owned corporation dedicated to servicing and repairing Beta LaserMike and Z-Mike/Zygo products. There are 10 FASI technician-owners in 4 locations, each with 20 to 30 years of experience supporting this specialized equipment. This means that their collective knowledge totals over two centuries.

Proton Products International is pleased to announce that FASI-Inc is now a Fully Authorized provider of technical support, including installation, commissioning, service, calibration, training and preventative maintenance for the complete range of Proton Products gauges and control systems throughout the USA. Over the coming months FASI-Inc engineers will be trained and furnished with all relevant materials to be able to provide our clients with the best service and support in our industry.

Further to the Service and Technical Support Role, FASI-Inc will also become a Sales Partner for Proton Products in the following States. Nebraska, Kansas, Oklahoma, Iowa, Missouri, Arkansas, Indiana, Illinois, Wisconsin

Commenting on the partnership Steve Cox, President of FASI Inc and Grant Latimer, Managing Director of Proton Products International said that the agreement is ideal for both of our companies. Proton has a fantastic range of products and a rapidly growing customer base in the USA. FASI-Inc has fantastic technical support people and a wide geographical coverage, putting these together just makes so much sense for both of us.
